Matthew Ross – (253) 228-8586 mbahoshy@gmail.com

Portfolio – www.mbahoshy.com Learn more about my projects and development skills.

Web Development Qualifications:

HTML/CSS	PHP	MySQL
HTML5	mySQL	XML
Javascript	XML	GitHub
jQuery, kineticJS	SEO, Analytics, and AdWords	Linux
Adobe Creative Suite		

Development Projects:

www.priveazy.com – Priveazy was a website designed to educate users how to stay safe and secure online. Created by an ex-Microsoft employee, I worked directly with Jay in a professional developing environment. My responsibilities included HTML/CSS, writing, designing, animating, and producing videos.

www.alpineaire.net – I created this website while working for my parent's HVAC company. It is designed with SEO principles in mind. The goal of this website is to make our company name and contact information available to as wide an audience as possible.

www.hvactrainerpro.com – This is a HTML5 web game powered by jQuery and KineticJS. It is a working simulation of electrical circuits found in HVAC equipment. It is a "beta" version of an educational program designed to train service technicians.

The database project – A PHP driven database application designed to manage and track customers, jobs, services, and equipment in an HVAC company. It was designed in response to an organizational need at Alpine Aire. The system is powered by MySQL and XML databases.

Work History:

University of Washington – Graduated in 2011 with a major in English

UW Surplus 2008 to 2011 – Student worker

Priveazy 2011 to 2012 – Writer, designer, developer

Alpine Aire Heating & Cooling 2012 to present – Service technician, lead installer, webmaster, etc
